

Articulating Arm GTO Operators seem to be the answer to the long standing problem of linear actuator arms getting pinched between the gate and oversized columns.

As you can see in the diagram below, the GP-SW100 & GP-SW050 GTO Swing Operators will reach right around most oversized columns as long as you have adequate setback clearance as indicated below.

GP-SW100 COMMERCIAL DUTY SWING GATE OPERATOR

For swing gates up to 20' (6.1 m) long and weighing up to 1200 lbs. (305 kg) per leaf

GP-SW050 RESIDENTIAL DUTY SWING GATE OPERATOR

For swing gates up to 16' (5 m) long and weighing up to 650 lbs. (295 kg) per leaf

GP PRODUCT NOTES

- FM144 is NOT compatible with the GP Units. If you desire a lock, it must be a Mag Lock.
- Ships without radios.
- Ships without the 2 required wet cell batteries.
- Has Entrapment Alarm, Type A, inherent entrapment sensing system and provision for separate installer/consumer added secondary type B1, B2 or D entrapment protection device(s)(not included).
